Financial Support for Open Access Publications

Publishing scientific articles and monographies rapidly incurs high costs: Authors at H-BRS can partly be refunded for a large part of the publication costs for their Open-Access-publications through three different grants.

- » **Publication Fund** to support Open Access in scientific publications (for Gold and Hybrid Open Access)
- » **DFG Funding** for Open-Access-publications (for Gold Open Access) until 2025
- » **Doctoral candidates** who are members of the PK NRW can apply for funding under certain conditions.

Further information on the individual grants and the application form can be found on the Research Service's website.
