ACCOMMODATION

Please note that the housing situation especially in the region of Bonn and Cologne is currently tense. Due to that fact we try our best to give you some hints for finding a suitable student accommodation.

More details about accommodation you will find here: <https://www.h-brs.de/en/accommodation-international-students>

Kindly note: There might be some free rooms offered in the official student residences in Bonn but we have no guarantee for that. We can only check the options as soon as we have your requests. For sure that would be the cheapest way for you. The student residences only rent their apartments/rooms for full months and the rates per months vary from 200€ - 350€. Additionally you have to pay a deposit for the student residence. It will be paid back to you by the student residence after you left the apartment.
