

# Digital Internationalisation (DI)

## What is Digital Internationalisation?

Digital internationalisation (DI) strengthens virtual mobility throughout the university by expanding digital courses with partners from abroad. It plays an important role in H-BRS's internationalisation strategy.

## What is the Purpose of Digital Internationalisation?

**Less than 10% of students** at H-BRS **take advantage of** our university's **outgoing programs**. For this reason, digital internationalisation pursues the following goals:

Increasing the diversity of courses, making them **inclusive** and **accessible**

Intensifying **international cooperation** ("bringing lecture halls together")

Developing **didactic concepts** and optimizing administrative processes

**Internationalisation@home**  
(Internationalisation of the curriculum)

**Global acquisition of knowledge and skills** by teachers and students

## DI Consultants

You are interested in designing **digital, international courses** with our partner universities or would like to exchange **best practices**?

The **DI consulting team** will be happy to provide you with a **personal consultation**!
